good morning, I know it is a lot to ask, but this project is rather insane.

We got back our initial lab results and they were confusing. We had good removal from one trailer (the one were the young man was sleeping, but no apparent removal for the other trailer. We are re-running the sample now. I am trying to figure out what happen and really need the temperature reading you collected asap.

Do you think you could get me this bit of data first thing today?

thanks
Rich

Greetings & Namaste – Rich,

It was indeed a great pleasure meeting and working with you.

Indeed all is well. Hope you had some relaxing time with your family over the holiday last week. I had taken Thurs & Friday off to spend time with my family.

As we speak, I am working on organizing my notes and data. I will get it to you as soon as it is ready, in a couple of days.

I will call you on Thursday.

Thanks

Namaste [REDACTED] Ex. 4 - CBI

Hope all is well.

I need the data you collected during our field activities at Dimock. We seemed to have gotten wildly different concentrations of Mn in our treated samples so I am forensically now trying to figure out an explanation. The methane is not critical for now. I am mostly interested in temperatures and other measurements you recorded at the taps and by pass and well head.

Could you please as soon as possible record your measurements into a spread sheet and forward them to me?

thanks, please give me a call if you want to talk about this whole endeavor.

Rich
